Quick facts

 Company:	Helsinki Region Infoshare
 Sector:	Public
 Product / service:	Application
 Type of data:	Public
 Origin:	Finland

Benefits

-  By visualizing real-time data on how and where snow ploughs are used in Helsinki. By specifying a time interval, different activities such as snow removal, spreading of sand, de-icing with salt, etc., are shown by using different colours.

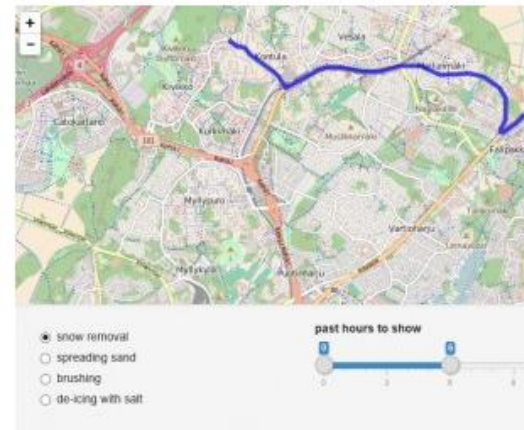

How Open Data is used

-  An API is used that shows the locations, routes, and activities of snow ploughs that are operated by Helsinki's service provider Stara.

Snowplows of Helsinki

Other information

-  The API also includes a flag specifying "bicycle and pedestrian lanes".
