Quick facts

- Company: enviroCar
- Sector: Transportation
- Product / service: Application and platform
- Type of data: Transportation
- Origin: Germany

Benefits

- Help to have public discussions about current traffic situations.
- Indicate needs for improvements in current traffic situations.
- The general impact of the individual driving behavior.

How Open Data is used

- At the moment enviroCar is not yet using Open Data from public sector organisations. For future enhancements public data sets on street networks, traffic density, characteristics of streets etc. would be desirable.
- The enviroCar project aims at gathering Open Data about different parameters of street traffic relying on the built-in sensors of cars.

The enviroCar platform

enviroCar app

enviroCar website

enviroCar server

citizens
scientists
administration
industry

Future plans

- Use Open Data in enviroCar.
- Broadening the scope of enviroCar to further countries and regions.
