Quick facts

- Company: GEO-C
- Sector: Education & Research
- Product / service: Research institute
- Type of data: All domains
- Origin: Germany

Benefits

- Increased degree of transparency in Open Data, and its re-use.
- GEO-C provides a set of best practices (and/or software code) useful to increase the transparency of open platforms in an open city context.

How Open Data is used

- GEO-C will use methods and approaches from Geoinformatics and its application areas to investigate open cities.
- GEO-C plans to give information about provenance of all datasets used in the project, as well as their relation to services developed within the project.
