Quick facts

- Company: Individual journalist
- Sector: Public safety
- Product / service: Website
- Type of data: Environment
- Origin: Greece

Benefits

- Visualising the forest fires in Greece in the last 15 years.

How Open Data is used

- Data from the Greek Fire Brigade which is published on the national portal, is used.
- This data contains information on the location of fires and the acres burnt.
- This data is then visualised in various ways.

Other information

- More detailed information about the fires, is also visualised on the page, for example each fire separately in a bar chart.
