AgriOpenData
Website and app

Re-use

URL http://www.finodex-project.eu/portfolio/agriopendata

Quick facts

- Company: AgriOpenData
- Sector: Agriculture, Fisheries, Forestry & Foods
- Product / service: Website and app
- Type of data: Agriculture
- Origin: Italy

Benefits

- The project will create a Decision Support System for the agricultural sector that will help the farms to correctly manage herbicides and fertilizers treatments.

How Open Data is used

- Benefits are realised through the collection and exploitation of Open Data, integrated with information gathered during the fieldwork.

Other information

- The expected users tend to use the platform in specific and concentrated moments of the year, with peaks of use because of the seasonality of the farming work.
