Quick facts

- Company: Italian Open Data Initiative
- Sector: Education & Research
- Product / service: Service
- Type of data: Education
- Origin: Italy

Benefits

- Allows visitors to compare schools in the Rome region.
- Having information on the institutions and the quality of training in Rome, allows citizens to make more informed choices.

How Open Data is used

- RomaScuola, developed under the umbrella of the Italian Open Data Initiative, allows visitors to obtain valuable information about all schools in the Rome region.
- Distinguishing it from other school portals is the ability to compare schools depending on indicators such as frequency of teacher absence, internet connectivity, use of IT equipment, frequency of students' transfer to other schools, etc.

Future plans

- Single Sign On will be implemented.
- Electronic Registry, hosting pupil data such as attendance and absence during school year, will be implemented.
- Calendar/events: the portal will notify parents of meetings and events organised by the institution attended by the pupil.
