Quick facts

| | |
|--|--------------------------------------|
|  Company: | Directorate for Local Administration |
|  Sector: | Public |
|  Product / service: | Portal |
|  Type of data: | Public services |
|  Origin: | Portugal |

Benefits

 The political pressure behind the execution of the portal led to the development of several web services regarding the integration of new Open Data on the portal. This ensured up to date data and reliable mechanisms.

How Open Data is used

-  The local government ministry created a transparency portal which aggregates and allows for the visualisation of a series of key indicators related to management of Portuguese Municipalities.
-  This portal was created based on Open Data present on the national Open Data portal, dados.gov.pt

Context

-  Six indicators are made available for all 308 Portuguese municipalities:
 -  Financial management
 -  Administrative management
 -  Fiscal decisions of municipality
 -  Economic dynamics of the municipality
 -  Municipal services
 -  Municipal electoral turnout
