PROJEKTI DRŽAVE (State Projects)
Website Service

Re-Use

URL   http://www.transparency.si/projekti/drzavni-projekti/

Quick facts

- Company: Transparency International Slovenia
- Sector: Public
- Product / service: Website
- Type of data: Public expenditure
- Origin: Ljubljana, Slovenia

Benefits

- Providing insights into the projects funded by the Slovenian State.
- The project visualises the geographical spread (regional level and municipality level) of projects and how they have evolved over time.

How Open Data is used

- The project uses Open Data on public expenditure, geographical data and data about the government institutions involved.
- The analysis of Open Data in this project is used to demonstrate the benefits of using Open Data and the results it can offer.

Other information

- The analysis in this project are the result of the collaboration between the Slovenian Ministry of Public Administration and Transparency International Slovenia.
- The project is used to stimulate both the provision of Open Data and to encourage the use of it.
