Quick facts

- Company: National Geographic Institute (IGN)
- Sector: Government & Public Sector
- Product / service: Application
- Type of data: Earthquake location, magnitude and depth
- Origin: Spain

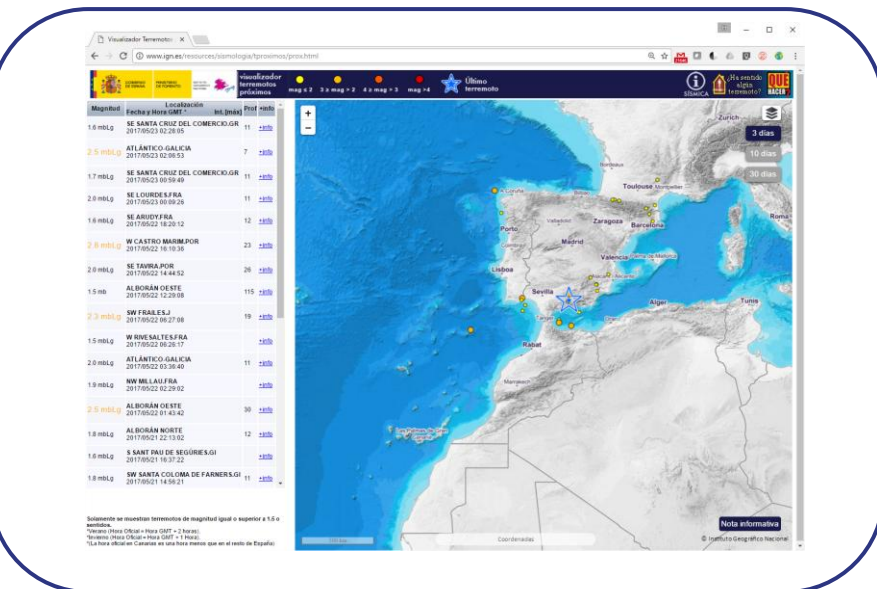

Benefits

- The near earthquake viewer shows the earthquakes occurred in the last 10 days in the area of the Iberian Peninsula, Balearic Islands and Canary Islands of magnitudes equal to or greater than 1,5, as well as sensed earthquakes.

How Open Data is used

- The viewer shows the result of the seismic analysis made by the IGN. This information is subject to change as a result of the continuous review of the seismic analysis.

Future plans

- The future is about maintaining and improving the viewer.
