Quick facts

- Company: Spotify
- Sector: Science & Technology
- Product / service: Company
- Type of data: Contextual data on music, artists
- Origin: Sweden

Benefits

- With Spotify, users have access to a world of music. Users can listen to artists and albums, create their own playlists of favorite songs, or discover more about artists and songs.

How Open Data is used

- Spotify has taken an open approach to the data that underpins its music streaming service. When it comes to finding out about artists and music, Spotify uses the fan-created and openly licensed MusicBrainz.

Other information

- Spotify is free to use on mobile and tablet. The premium version includes the following features: play any song, any time on any device - download music for offline listening - no ads, just uninterrupted music.
