Swiss Transit

Application

Re-use

URL	http://launch.transitapp.ch/

Quick facts

- Company: Swiss Transit
- Sector: Transport
- Product / service: Application
- Type of data: Transport Data
- Origin: Switzerland

Benefits

- Swiss Transit App is the travel companion for your trip in Switzerland, allowing users to search for instance about stations, departure times etc. For different types of vehicles: trains, trams, buses, cablecars, boats, etc.

How Open Data is used

- The application uses (real-time) Open Data from different transport operators. The official timetables data is enriched where available with info provided by opentransportdata.swiss departures API.

Other information

- The application also offers offline support - you can search for stations or departures without having an internet connection
