Quick facts

- Company: Diabetes Risk Checker
- Sector: Health
- Product / service: Application Service
- Type of data: Medical data
- Origin: UK

Benefits

- Calculates your risk of developing type 2 diabetes based on your behaviour.
- Warns you of dangerous behaviour.

How Open Data is used

- The app collects information by asking simple questions, then performs calculations based on the open source ClinRisk Diabetes algorithm. The algorithm is based on Open Data from the medical institutions.

Other information

- Developed by UK Doctors and academics working in the National Health Service.
- Source code is published on GitHub.
