Quick facts

-  Company: Spend Network
-  Sector: Public sector
-  Product / service: Service/Tool
-  Type of data: Financial
-  Origin: United Kingdom

Benefits

-  It enables individuals, public servants and companies to engage with public procurement data.
-  Being able to identify more competitive contracts between suppliers and government departments.

How Open Data is used

-  Providing information on government data in a much more usable resource. Spend Network can be seen as a database for sales between buyers and suppliers (in the UK) and of wider EU tenders
-  Registration is required to access added-value services. These include data which has been linked, cleaned or aggregated.

Public purchasing analysis

Spend Network is an easy to use open data tool for government and its suppliers.
