## Quick facts

-  Company: The Vatican museums
-  Sector: Education, Culture & Sport
-  Product / service: Website
-  Type of data: Cultural data
-  Origin: Vatican City

## Description

The Online catalogue of the Vatican Museums presents essential information regarding the mobile works of art (that is, excluding the spaces, buildings or their decorations) on display along the tour itinerary. The database – still in the implementation phase and available at present only in Italian – is periodically updated, revised and expanded. The *Online catalogue* is managed and updated by the Collections Registry and Central Catalogue [Collections Registry and Central Catalogue](#) of the Vatican Museums, in collaboration with different scientific departments.

## Benefits

The Vatican is at the heart of Christianity and Christian art. The online collection will offer the possibility to study art and practice religion from home.

## How open data is used

Cultural open data is uploaded in the form of high-resolution images of art. The [Collections Registry and Central Catalogue](#) provides data in Italian with information and images about art works for their online visitors. Thereby, the museum also provides a digital 360 tour through the different museums.
